

🎮 Hangman Game

A classic console-based Hangman game built with Python.

Features

- 5 predefined words chosen at random each round
- ASCII art hangman that updates with each wrong guess
- 6 incorrect guesses allowed
- Tracks all tried letters and wrong letters separately
- Play-again option after each round

How to Run

```
```bash
python hangman.py
```
```

Gameplay

- The game picks a secret word and shows blanks (`\_`) for each letter.
- Type one letter at a time and press Enter.
- Correct letters are revealed in their positions.
- 6 wrong guesses and the man is hanged — game over!

Concepts Used

`random` · `while loop` · `if-else` · `strings` · `sets` · `functions`

Sample Run

```
```
